WatchGuard® XTM 2 Series

With a WatchGuard® XTM 2 Series appliance, your network is:

**SECURE**
- Application-layer content inspection recognizes & blocks threats that stateful packet firewalls cannot detect.
- Wide-ranging proxy protection comes from robust security on HTTP, HTTPS, FTP, SMTP, POP3, DNS, TCP/UDP.
- Security subscriptions boost protection in critical attack areas for complete unified threat management.
- Includes Skype blocking – the first of a new generation of built-in application-blocking capabilities.
- Delivers integrated SSL VPN for simple, anywhere-anytime network access.

**EFFICIENT**
- Scriptable CLI supports interoperability and allows easy integration into existing infrastructure for quick, direct connection.
- Interactive, real-time monitoring and reporting – at no extra charge – give an unprecedented view into network security activity, so you can take immediate preventive or corrective actions.
- Intuitive management console centralizes configurations and streamlines remote management.
- Three 1-GbE interfaces allow faster link speeds, which is particularly useful for trusted LAN.
- Role-based access control (RBAC) allows top administrator to create custom roles for granular control.
- Drag-and-drop Branch Office VPN setup – three clicks and your remote office is connected.

**FLEXIBLE**
- Call setup security for VoIP means you don’t need to “wire around the firewall” to take advantage of the big cost savings that VoIP can generate.
- WAN and VPN failover increase performance, redundancy, and reliability.
- Multiple VPN choices deliver flexibility in remote access.
- Includes PPPoE options for modem setup and scheduled redial for predictable PPPoE session restarts where regional providers require them, without the disruption of a full appliance reboot.
- Advanced networking features, like transparent bridge mode and multicast over VPN, allow you to add security without needing to change existing network infrastructure.

**WIRED OR WIRELESS – YOUR CHOICE**
- Wireless models include optional dual-band 802.11n technology for much more responsive wireless network connection and expanded range. Allows users to access 2.4 GHz or less crowded 5GHz band.
- Three distinct wireless security zones give administrators precise control over Internet access privileges for different user groups.
- Wireless guest services segment the Internet for customers/guests.

**CAPABLE**
- Multi-layered, interlocking security protects the network.
- Secure remote connectivity keeps mobile workforce productive.
- Intuitive, centralized management gives you the control you need to manage efficiently.
- Choice of wired or wireless models to suit your specific business requirements.
- Security and reporting tools support industry and regulatory compliance.

**VPN Tunnels (ind/max)**

| Branch Office VPN | 5 |
| Mobile VPN IPSec  | 1/1 |
| Mobile VPN SSL    | 1/11 |

**Security Features**

- Stateful packet inspection, deep application inspection, application proxies
- HTTP, HTTPS, SMTP, FTP, DNS, TCP, POP3
- Blocks spyware, DoS attacks, fragmented & malformed packets, blended threats, and more
- H.323, SIP, call setup and session security
- WebBlocker, spamBlocker, Gateway AntiVirus, Intrusion Prevention Service

**VPN & Authentication**

- DES, 3DES, AES 128-, 192-, 256-bit
- SHA-1, IKE pre-shared key, 3rd party cert
- Yes
- Thin client, Web exchange
- Server and Passsthrough
- Transparent Active Directory Authentication
- Radius, LDAP, Windows Active Directory
- VASCO, RSA SecurID, web-based, local

**Management**

- WatchGuard System Manager (WSM)
- SNMP v2/v3, Email, Management System Alert
- Logging and Reporting with Server Health status, Quarantine, WebBlocker, Management
- Includes direct connect and scripting

**Dashboard Networking**

<table>

**Support and Maintenance**

- Hardware warranty, 12/5 technical support with 4-hour response time, software updates, threat alerts

**Certifications**

- ICSCA, FIPS 140-2 and EAL4+ in progress
- NRTL, CB
- WECC, RoHS, REACH

---

**Choose Your Operating System**

XTM 21 and XTM 22 models ship with the Fireware® XTM operating system. As network requirements become more complex, it’s easy to upgrade to the Pro version of the OS using a downloadable software license key. (Fireware XTM Pro ships with the XTM 23 appliance.)
